

# AI Legal Mitra

**Team Name: Clause\_Busters**

## Problem Statement

Legal jargon and complex clauses make legal documents hard for ordinary people to understand. Many individuals struggle to interpret contracts, agreements, and policies, which can lead to confusion, unfair outcomes, or missed opportunities. Access to affordable and quick legal help is limited.

## Proposed Solution

AI Legal Mitra is an AI-powered assistant designed to simplify legal documents for everyone. It explains clauses in simple, everyday language, highlights potential risks, and provides quick legal insights. The system acts as a digital 'Mitra' (friend), ensuring people can make informed decisions without needing expensive consultations.

## Uniqueness

Unlike traditional legal services, AI Legal Mitra is available 24/7, cost-effective, and user-friendly. It bridges the gap between complex law and common people, offering instant legal clarity with a friendly touch.

## Technology Stack

- Natural Language Processing (NLP) for understanding legal text
- Machine Learning models for clause classification
- Simple web-based interface for accessibility
- Cloud integration for scalability and security

## Real-World Impact

AI Legal Mitra empowers individuals and small businesses by simplifying legal complexities. It promotes financial and legal literacy, reduces dependency on costly lawyers for basic queries, and creates a more transparent legal ecosystem. This tool has the potential to become a trusted everyday legal companion for millions.
